Why Natural Stone?

AESTHETICS

No two natural stone veneers look the same. Natural stone textures and tonal variations are literally thousands of years in the making, which means each completed project is one-of-a-kind.

EARTH-FRIENDLY

Natural stone is pure. It comes straight from the earth whether it's fieldstone or quarried.

LOW-MAINTENANCE

Natural stone veneer requires very little maintenance after installation and it can withstand harsh weather conditions.

SIMPLE INSTALLATION

Natural stone veneer can be placed directly over bricks or other rigid structures.

INTERIOR & EXTERIOR APPLICATIONS

Natural thin stone can enhance both interior and exterior projects. Whether a hotel lobby remodel, a custom residential fireplace or the exterior of a new corporate headquarters - natural stone veneer provides a stunning solution.

NATURAL STONE
SOLUTIONS

BEAUTIFUL | TIMELESS | UNIQUE

Natural Stone Thin Veneer: NSS products are made from the world's premier building material, real natural stone. We artfully transform quarried stone into precisely finished thin profiles which allow for the creation of truly distinctive designs.
